LAB 1

LAB TITLE

Installation of DEV-C++ IDE and Execution of First C++ Program

---

1. OBJECTIVE

The objective of this lab is to learn how to install the DEV-C++ Integrated Development Environment (IDE) and run a basic C++ program. Students learn how to create, compile, and execute a simple C++ program using DEV-C++.

2. THEORY

C++ is a widely used programming language for developing software and engineering applications. To write and run C++ programs, a programming environment called an Integrated Development Environment (IDE) is used.

DEV-C++ is a beginner-friendly IDE that allows programmers to write, compile, and run programs easily. It provides a code editor, compiler, and output window in one place. Every C++ program begins with the main () function, where the execution of the program starts. The cout statement is used to display output on the screen.

3. SOFTWARE

- DEV-C++ IDE
- C++ Compiler (included in DEV-C++)

4. Procedure / Process

Step 1: Install DEV-C++

1. Download DEV-C++ from the official website.
2. Install the software on the computer.
3. Open DEV-C++ after installation **Step 2: Create a New C++ Program**

1. Click **File → New → Source File**.
2. A blank editor window will open.
3. Click **File → Save As**.
4. Save the file as: lab1_hello.cpp

Step 3: Write the First C++ Program

```
#include <iostream> using
namespace std;

int main()
{
    cout << "Hello World!";
return 0;
}
```

Step 4: Compile and Run the Program

1. Click **Execute → Compile**.

Click **Execute → Run**.
The output window will display the program result.

GitHub Task

In this lab, students also learned how to:

1. Create a GitHub account.
2. Create a repository named **Cpp-Lab-Tasks**.

3. Upload the file **lab1_hello.cpp**.
4. Share the repository link with the instructor.
   CP26_Lab_01

Conclusion

In this lab, we learned how to install the DEV-C++ IDE and create our first C++ program. We also learned how to compile and run the program successfully. Additionally, we learned how to upload lab files to GitHub for submission and record keeping.
